

EIGHTH
ANNUAL REPORT

OF THE
REGISTRAR-GENERAL

OF
MARRIAGES, BIRTHS, AND DEATHS
IN IRELAND.

1871.

Presented to both Houses of Parliament by Command of Her Majesty.

DUBLIN:
PRINTED BY ALEXANDER THOM, 87 & 88, ABBEY-STREET,
FOR HER MAJESTY'S STATIONERY OFFICE.

1874.

[C.—968.] Price 9d.

CONTENTS.

REPORT:—

	Page
POPULATION, MARRIAGES, BIRTHS, DEATHS, and EMIGRATION, in 1871,	5
Marriages—their Number and Proportion to the Population,	5
Minors, Widowers and Widows, and Signatures to Marriage Registers,	5
Ages of Persons Married,	6
Number of Marriages and Proportional Number (1) of Persons Married who wrote their Names in the Registers, (2) of Persons not of Full Age, and (3) of Re-marriages, in each Registration Division in the years 1864-71 (Table I.),	7
Marriages (1) of Roman Catholics, (2) of Protestants, and the total Number registered in each Quarter of the Year,	8
Marriages of Protestants from 1845 to 1871, celebrated according and not according to the Rites of the late Established Church (Table II.),	9
Buildings registered for the Solemnization of Protestant Marriages (Table III.),	10
Marriages by Registers' Licence, and by Presbyterian Ministers' Licences,	12
Births registered in 1871,	12
Deaths registered in 1871,	13
Emigration from each Province during the year 1871,	14
Meteorological Observations,	14
Remarks on the progress of Registration,	15

SUMMARY OF THE QUARTERLY REPORTS, 1871:

First Quarter, ending March 31st,	17
Second Quarter, ending June 30th,	20
Third Quarter, ending September 30th,	23
Fourth Quarter, ending December 31st,	27

Topographical Description of the Eight Registration Divisions of Ireland,	30
Estimated Population of Ireland from 1801 to 1871,	32

ABSTRACTS:—

Marriages registered in Ireland in each of the Divisions and Superintendent Registrars' Districts, also in each Province and County, in 1871, distinguishing Roman Catholic from Protestant Marriages, and giving the Total Number registered in each Quarter of the Year; the Conjugal Condition of Persons Married; the Number of Minors, and of those who signed the Registers by Marks,	34-43
Ages of 19,408 Persons married in 1871, distinguishing those of Bachelors, Spinsters, Widowers, and Widows,	44, 45
Marriages, Births, and Deaths registered in each of the Divisions and Superintendent Registrars' Districts, and in each Province and County in 1871; also Births and Deaths, and Excess of Births over Deaths in each of the Registrars' Districts of Ireland, distinguishing the Sexes and Illegitimate Births throughout,	46-70

	Page
Births registered in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties (distinguishing Males and Females) in each of the Four Quarters of 1871,	72-81
Deaths registered in each of the Four Quarters of 1871 (distinguishing Males and Females), in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties,	82-91
Deaths of Males and Females at different Ages registered in 1871, in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties,	92-99
Causes of Death of Males and Females in Ireland, at different periods of life, in 1871,	100-107
Supplementary Table of Causes of Death of Males and Females, at different periods of life, in 1871,	108-111
Causes of Death of Males and Females in Ireland, and in each of the Divisions, in 1871,	112-119
Deaths from several Zymotic and other Causes in 1871, in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties,	120-123

APPENDIX.

Letter to the Registrar-General on the Causes of Death in Ireland in 1871, from WILLIAM M. BUNKE, Esq., F.C.P.S.,	127-130
Copy of Circular relating to Registration of Roman Catholic Marriages,	131

Index of Superintendent Registrars' Districts, and of Registrars' Districts,	132-133
--	---------

REPORT

TO

His Grace, JAMES, DUKE OF ABERCORN, K.G., &c., &c., &c.,
Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR GRACE,—

As directed by the provisions of the 26 Vic, cap. 11, sec. 49, the 26 & 27 Vic, cap. 90, sec. 16, and the 7 & 8 Vic, cap. 81, sec. 56, I have the honour to transmit to your Grace, in order that the same may be laid before Parliament, General Abstracts of the Births, Deaths, and Marriages registered in Ireland during the year 1871.

A General Abstract of the number of Births, Deaths, and Marriages, registered in the year 1871, was presented to Parliament in the Session of 1872. The Report now submitted contains detailed tables of the Ages and Condition of persons Married; of Births, distinguishing legitimate from illegitimate; and of Deaths, and their Causes.

The Acts for the Registration of Births and Deaths, and Roman Catholic Marriages, came into operation on the 1st of January, 1864, but that for the Registration of Protestant Marriages of all denominations has been in force since the 1st of April, 1845.

For the purposes of Registration, the country has been divided into 163 Superintendent Registrars' Districts—co-extensive with the Poor Law Unions—and into 790 Registrars' Districts, which, with a few exceptions, are of equal extent with the Dispensary Districts formed under the Medical Charities Act.

GENERAL SUMMARY.

The *estimated* population of Ireland in the middle of 1871 was 5,395,007 the persons whose marriages were registered during the year, amounted to 57,920, the number of marriages being 28,960; children born alive whose births were registered, amounted to 151,355; and the number of deaths registered was 88,348. The emigrants from Ireland during the year 1871 amounted to 71,240. In the previous year—1870—there were registered 28,667 marriages, 149,846 births, and 90,462 deaths; the number of emigrants was 74,855.

MARRIAGES.

28,960 marriages were registered in Ireland during 1871, being in the proportion of 1 marriage to every 186 of the *estimated* population. The ratio in England in the same year was 1 in 120.

743 men and 3,835 women contracted marriage before they had

attained their twenty-first year. The proportion of males married under age was 2·57; of females, 13·24 per cent. The proportions in England and Wales in 1871 were—males, 7·9, and females, 22 per cent.

Of widowers, 3,148, and of widows, 1,708 were re-married; the proportion to the total marriages being 10·87 per cent. of widowers, and 5·90 per cent. of widows. The corresponding proportions in England and Wales were 13·9 per cent. widowers, and 9·7 per cent. widows.

According to the provisions of the Registration Acts, every registry of a marriage is required to be signed by the parties married, two witnesses, and the officiating clergyman. A test of the elementary education of the persons contracting marriage is thus afforded by comparing the number who write their names in the registers, with the number who make a mark. Of 57,920 persons married in 1871, 23,954 (10,858 men and 13,096 women) signed the registers with marks; being in the proportion of 41·36 per cent.—37·49 per cent. of the males, and 45·22 per cent. of the females married.

The corresponding rates in England and Wales for the same year were 19·4 per cent. of males, and 26·8 per cent. of females.

In Ireland, the marriage register was signed by mark by both parties in 8,850, and by one or other of the persons married in 6,254 instances—thus in 15,104, or 52·2 per cent. of the total number of marriages registered, one or both of the persons married signed by mark.

The marriage registers contain a column in which the age of each of the parties married is inserted; but as the law only requires it to be stated whether the parties are “of full age” or “minors,” the precise age at marriage is not always entered in the registers. In 1871 the exact ages of both parties were given in 9,743 instances. Of these 8,763 were bachelors, and 9,259 spinsters; 980 were widowers, and 484 widows. The largest number of wives married between the ages of 21 and 30—the number being 5,946, or more than one-half of the whole number whose ages are recorded. The largest number of husbands—5,646—also married between 21 and 30 years of age.

268 bachelors were married to widows, both of whose ages at the time of marriage are recorded. 142 of these widows and 133 of the bachelors married between 25 and 35 years of age. 764 of the marriages in which the ages of both parties were recorded, were between widowers and spinsters, 408 of the former being between the ages of 30 and 45, and 524 of the latter between 21 and 35.

Of widowers and widows married, whose ages at the time of marriage are stated, there were 216 couples. Of these the largest number of widows were between 35 and 45, and of widowers between 45 and 55.

With respect to Roman Catholic Marriages, the 26 & 27 Vic., cap. 90, directs that parties about to contract marriage shall produce to the clergyman celebrating the marriage a certificate, to be procured from the Registrar, filled up as far as possible by that officer with the particulars necessary to be registered, which certificate the parties married, the witnesses, and the officiating clergyman are required to sign. When so filled up the certificate is to be returned within three days to the Registrar by the husband, under a penalty of ten pounds.

With a view to facilitate the registration of marriages under the Act referred to, and at the special request of several dignitaries of the Roman Catholic Church,—with the approval of the Law Officers of the Crown—

(who at that time were the Right Hon. Thomas O'Hagan, M.P., and James A. Lawson, esq., Q.C.)—I instructed the District Registrars to furnish to each parish priest, who should apply for them, forms of certificate to be duly filled, signed, and forwarded to the Registrar on the occasion of a marriage, thus saving the husband the inconvenience of procuring from the Registrar a form of certificate previous to his marriage, as required by the Statute.* I also furnished all the Roman Catholic clergy in Ireland with copies of the Act above referred to, in order that the requirements of the law might be known to them previous to the Act coming into operation.

The number of marriages; proportion per cent. of persons married who wrote their names in the registers, of minors, of widowers, and of widows, are given in the following table, for the several registration divisions:—

TABLE I.—*The Number of Marriages in the Eight Divisions of Ireland during the years 1864–71, and proportion per cent. of Persons who signed their Names, of Persons not of Full Age, and of Re-marriages.*

Registration Divisions.		Number of Marriages.	Signed their Names in Writing.		Persons not of Full Age.		Re-marriages.

	1869	4,322	59.6	48.3	2.17	16.87	10.09	6.65	
	1870	4,739	59.4	47.6	2.28	15.62	9.60	7.01	
	1871	4,497	60.8	51.4	2.45	14.81	11.41	6.85	

The extent and position of each of these divisions are specified at p. 30.

Of the total number of marriages (28,960) registered in 1871, 20,942 were celebrated by Roman Catholic clergymen, and entered in the register books by the Registrars in accordance with the 26th and 27th Vic., cap. 90; and 8,018 marriages were of members of the various Protestant persuasions. Of the latter marriages 4,205 were in churches and chapels of the late Established Church, 2,805 in Presbyterian Meeting-houses, 294 in "Registered Buildings," 697 in the Registrars' offices, 14 according to the usages of the Society of Friends, and 3 marriages were of members of the Jewish persuasion.

Of the entire number of marriages in 1871 there were contracted in

the quarter ending the last day of March, 11,815; of June, 5,674; of September, 5,313; of December, 6,158.

The following table gives a statement showing in continuation of the return in my report for 1870, the number of marriages solemnized in Ireland under the Marriages Act of 1844, distinguishing the mode of celebration:—

TABLE II.—*The Number of Marriages registered under 7 & 8 Vic., c. 81, in each Year, from 1st April, 1845, to 31st December, 1871, and the Mode in which the Marriages were solemnized.*

Years ended 31st December	Marriages.

There is not any return made to me of the places of worship belonging to Roman Catholics, in which marriages are celebrated; but under the provisions of the 7th & 8th Vic., cap. 81, I am enabled to state respecting other religious persuasions, that there were 1,502 Churches and Chapels of the late Established Church, 590 registered Presbyterian Meeting-

* The 7 & 8 Vic., c. 81, came into operation 1st April, 1845.

† The increase in the number of marriages by Special Licence and in those on Registrar's Certificate in 1871 is caused by the provisions of sections 86 and 88 of "The Matrimonial Causes and Marriage Law (Ireland) Amendment Act, 1870."

houses, and 236 Registered Buildings belonging to various denominations, in which marriages might lawfully be solemnized, on the 31st December, 1871. During the year 1871 there was an increase of 10 in the number of such places in the late Established Church; of 5 in the Presbyterian Church; and of 5 in other religious communities. The "Registered Buildings" belong to the following denominations:

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Wesleyan Methodists,	136	Methodists New Connexion,	6
Reformed Presbyterians,	34	Church Methodists,	1
Independents,	20	Covenanters,	1
Baptists,	13	Evangelical Union,	1
Seceders,	11	United Original Seceders,	1
United Presbyterians,	7		
Moravians, or United Brethren,	5	Total,	236

The following Table shows by Divisions and Registrars' Districts the number of places of worship in which marriages (under the 7 & 8 Vic., cap. 81.) may be solemnized in each District or Union, distinguishing the religious denominations:—

During the year 1871 there were issued by the Registrars, 747 Licences for Marriage in Registered Buildings and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary:—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1871.	Number of Registered Meeting-houses on 31st December, 1871.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland, . . .	127	549	2,658
2. Remonstrant Synod of Ulster, . . .	8	21	35
3. Presbytery of Antrim, . . .	4	10	86

5. Northern Presbytery of Antrim, . . .	1	6	11
Total, . . .	144	600	2,761

BIRTHS.

The births registered in Ireland during 1871, amounted to 151,355. Of these, 77,314 were males, and 74,041 females, being in the proportion of 104 boys to every 100 girls. In England also, in the same year, the number of males to 100 females whose births were registered was 104.

The rate per cent. of births to the *estimated* population was 2·805, or 1 in 36 of the population. In England the rate per cent. was 3·50.

There were 4,150 illegitimate births, of which 2,150 were those of males, and 2,000 females; the proportion to the total number of births being 2·7 in every 100. The rate in England was 5·6 per cent. In Ireland, the highest rates, 5·2 and 3·3, of illegitimate children in every 100 born, occurred in the North-Eastern and South-Eastern Divisions respectively.

The following table shows the proportion of legitimate and illegitimate births registered in each of the eight Divisions in 1867, 1868, 1869, 1870, and 1871.

TABLE IV.—*The Per-centage of Legitimate and Illegitimate Births registered in Ireland during the years 1867, 1868, 1869, 1870, and 1871, by Divisions.*

Divisions.	Proportion per cent. of Legitimate Births.					Proportion per cent. of Illegitimate Births.				
	1867.	1868.	1869.	1870.	1871.	1867.	1868.	1869.	1870.	1871.

South-Western, . .	98.0	97.9	98.5	98.3	98.4	2.0	2.1	1.7	1.7	1.6

41,615 births were registered during the quarter ended 31st March; 40,768 in that ended 30th June; 34,022 during that ended 30th September; and 34,950 in that ended 31st December.

DEATHS.

The deaths registered in 1871 amounted to 88,348—44,233 males, and 44,115 females—being in the proportion of 1.638 per cent. of the estimated population, or in the ratio of 1 registered death to every 61 persons. The proportion in England for the same year was 2.26 per cent., or 1 in 44.

The following table shows the per-centage of mortality at different ages:—

TABLE V.—*The Mortality per Cent. at each Age-period, according to the Registration of Deaths in Ireland, during the Years 1864-1871, by Sexes.*

Of the persons whose deaths were registered during the year 25·56 in every 100 were children under 5 years old—27·25 per cent. of the males and 23·85 per cent. of the females. 14·99 per cent. of the men, and 16·81 per cent. of the women, whose deaths were registered had passed their 75th year. 63 of the males and 89 of the females in every 10,000 were stated in the returns to have been over 95 years of age.

26,420 deaths were registered during the first quarter of the year; 22,260 during the second; 17,451 during the third; and 22,217 during the fourth quarter.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several seaports, the number of emigrants who left Ireland during the year 1871 amounted to 71,240; of these 41,358 were males and 29,882 females. Of the whole number, 15,850 were from Leinster; 13,199 from Munster; 28,066 from Ulster; and 9,049 from Connaught: 5,076 persons did not state the county or province to which they belonged.

Of the emigrants in 1871, 11·9 per cent. were under 15 years of age; 76·4 per cent. were 15 to 35 years old; 10·9 per cent. were 35 and upwards; and the ages of 0·8 per cent. were not specified in the returns.

METEOROLOGY.

The following is an abstract of the Meteorological Observations taken during the year 1871 at the Ordnance Survey Office,* Phoenix Park, Dublin, furnished by Lieutenant-Colonel Wilkinson, R.E., by direction of the Superintendent of the Ordnance Survey.

The barometer was highest during the year at 9.30 P.M. on 28th March, when it stood at 30·603 inches, wind E.N.E.; it was lowest on 15th January, at 9.30 P.M., wind S.E., when it registered 28·423 inches.

The highest temperature in the air was 81·9°, on 10th August, and the lowest was 23·5°, on 4th December.

Rain or snow fell on 176 days during the year. The total amount registered was 28·252 inches. The greatest rain-fall in twenty-four hours was 1·160 inches, on 26th September, wind E.

The prevailing wind was the W., from which point it blew on 107 days; it blew from S.W. on 57 days; from S. on 46 days; from E. on 43 days; from S.E. on 30 days; from N. on 24 days; from N.W. on 21 days; from N.E. on 9 days; and the air was calm on 28 days, at 9.30 A.M. The total pressure of W. wind was 238·00 lbs. per square foot, giving an average of 2·22 lbs. for each day. The strongest wind was from S.W., on 18th December, when the pressure was 16 lbs. per square foot.

* Latitude 53° 21', 44' 33", north; longitude 6° 21', 6' 35", west. Height above the sea 158·8 feet. The barometrical readings have been corrected for altitude, and reduced to 32° Fahrenheit.

I beg here to repeat the observations made in my former Reports, with respect to the working of the Acts for the Registration of Births, Deaths, and Marriages in Ireland, as I regret to state that the numbers of these events registered in 1871 do not show much improvement compared with previous years:—

"In several instances prosecutions have been resorted to with some advantage; but notwithstanding the exertions made to induce a general compliance with the law throughout the country, numerous cases of neglect to register births and deaths have been reported to me by the District Registrars, but frequently at too late a period after their occurrence to allow of the parties being proceeded against at the Petty Sessions.

"I regret to add that the registration of marriagee under the 26th & 27th Vic., cap. 90, is not at all satisfactory in some Districts, owing to the Clergy who have celebrated the marriagee having declined to sign the necessary certificates.

"The marriages solemnized under the provisions of the 7th & 8th Vic., cap. 81, which came into operation in 1845, are, I believe, all registered.

"The following are the ratios of Births, Deaths, and Marriages to population in different countries compared with the ratio in Ireland in 1864 [and in 1865, 1866, 1867, 1868, 1869, 1870, and 1871]:—

COUNTRIES.	RATIO TO POPULATION.		
	Births.	Deaths.	Marriages.
IRELAND (in 1864),	1 in 42	1 in 61	1 in 207
IRELAND (in 1865),	1 " 39	1 " 61	1 " 183
IRELAND (in 1866),	1 " 38	1 " 60	1 " 185

Hanse Towns: Bremen,	1 " 28	1 " 37	1 " 165
Holland,	1 " 30	1 " 42	1 " 127
France,	1 " 38	1 " 44	1 " 137
Spain,	1 " 26	1 " 32	1 " 127
Austria (exclusive of Hungary),	1 " 25	1 " 31	1 " 131

"It will be seen from the foregoing figures, compiled from the Statistical Tables published by the Board of Trade, how incomplete was Registration in Ireland in 1864, and comparing the number of Births, Deaths, and Marriages recorded in that year with those since annually registered, I regret to state that there appears but little improvement in the subsequent years:—

	1864.	1865.	1866.	1867.	1868.	1869.	1870.	1871.

Following this Report are summaries of the Quarterly Reports issued in 1871, and the Appendix contains a letter addressed to me by Dr. Burke, the Superintendent of Medical Statistics, respecting the causes of death—to which I beg to refer.

I have the honour to be

Your Grace's very faithful servant,

WILLIAM DONNELLY,
Registrar-General.

GENERAL REGISTER OFFICE,
CHARLEMONT HOUSE,
Dublin, 7th April, 1874.

SUMMARY OF THE QUARTERLY REPORTS, 1871.

Quarterly
Reports.
—
First
Quarter.

First Quarter—January, February, March.

Marriages.—There were 11,815 marriages registered in Ireland during the first quarter of 1871, a number affording an annual ratio of 1 in every 114, or .876 per cent. of the *estimated* population. The average number of marriages registered in the corresponding quarter of the years 1866–70 was 11,708.

Births.—The births registered during the first quarter of the year 1871 amounted to 41,615—21,154 boys and 20,461 girls—affording an annual ratio of 1 in every 32.4, or 3.09 per cent. of the *estimated* population. The average number of births registered during the corresponding quarter of the previous five years was 38,856.

Deaths.—There were 26,420 deaths—13,069 males, and 13,351 females—registered during the quarter, affording an annual ratio of 1 in 51.1, or 1.96 per cent. of the *estimated* population. The average number registered during the first quarter of the preceding five years was 27,614.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 31st March, 1871, amounted to 11,355—7,425 males and 3,930 females. The average number of emigrants during the corresponding quarter of the preceding five years was 15,162.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4-lb. loaf for the quarter ended 31st March, 1871, was 7½d., being 1½d. dearer than it was during the corresponding period of 1870.

At the Dublin Corn Exchange the average price of oatmeal for the quarter was 15s. 2d. per cwt.; during the first quarter of 1870 it was 14s. 3d.; in the corresponding period of 1864 it was only 11s.

At the Dublin Potato market the average prices of potatoes during the quarter ranged from 3s. 1d. to 5s. 6d. per cwt., against 3s. 9d. to 4s. 8d. in the corresponding quarter of the preceding year; the average prices for the first quarter of 1864 were only 2s. 6d. to 3s. 3d.

The average prices of beef at the Dublin Cattle Market during the quarter were 60s. to 73s. 6d. per cwt., against 54s. 6d. to 66s. 6d. in the corresponding period of 1870; for the first quarter of 1864 the average prices were 51s. 6d. to 64s. 6d.

The following statement shows the average prices of the foregoing articles of food in Dublin during the first quarter of the years 1864–71:—

YEARS.	BREAD (Messrs. Manders & Co.'s 4 lb. loaf).	OATMEAL (Corn Exchange), per cwt.	POTATOES (at Potato Market), per cwt.		BEEF (at Dublin Cattle Market), per cwt.	
	d.	s. d.	s. d.	s. d.	s. d.	s. d.
1864 (1st quarter).	6	11 0	2 6	to 3 2	51 6	to 64 6
1865 "	5½	11 9	3 1	to 3 7	54 6	to 68 9
1866 "	6½	14 10	2 6	to 3 6	50 6	to 63 6
1867 "	8	16 1	4 5	to 5 7	53 0	to 70 0
1868 "	9	16 10	4 6	to 5 10	49 6	to 63 6
1869 "	7	15 8	3 8	to 4 12	54 6	to 70 0
1870 "	6	14 3	3 9	to 4 8	54 4	to 66 6
1871 "	7½	16 2	3 1	to 5 6	58 0	to 73 6

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1871 was 52,096, against 55,867 for the corresponding period of 1870.

Quarterly
Reports.
First
Quarter.

The average weekly number of persons receiving out-door relief during the quarter was 24,748, against 31,727 during the first quarter of 1870.

Of the persons receiving in-door relief during the first quarter of 1871, an average number of 513 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1870 the average weekly number was 497.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phoenix Park, Dublin, during the first quarter of the year 1871 was 29.881 inches, against an average of 29.747 inches for the corresponding quarter of the preceding five years; the highest reading (30.603) was on the 28th March, at 9.30 p.m., wind E.N.E.; and the lowest (28.423) on the 15th of January, at 9.30 p.m., wind S.E.

The mean temperature of the air during the quarter was 42.2°, against an average of 41.8° for the corresponding period of the preceding five years; the maximum temperature (67.1°) was on the 24th March, and the minimum (25.8°) on the 25th January.

Rain or snow fell on 36 days during the quarter. The rain-fall measured 6.917 inches; the average amount for the first quarter of the previous five years was 6.889 inches. The greatest monthly rain-fall during the quarter was in January, when 3.771 inches were registered.

It blew on 23 days from W., on 19 days from S.W., on 10 days from S., on 9 days from E., on 7 days from N.W., on 5 days from S.E., on 2 days from N., on 1 day from N.E., and the air was calm on as many as 14 days, at 9.30 A.M.

HEALTH OF THE PEOPLE.

The state of the public health during the quarter was, with some exceptions, satisfactory. The harsh easterly winds proved very fatal to the aged and infirm, and the principal mortality was due to pulmonary affections. Small-pox, which prevailed to an alarming extent in England, made its appearance in about twenty districts of the country. In almost all the cases the infection could be traced to English or Scotch sources. In the month of January an English recruit was admitted into the General Military Hospital, Phoenix Park, labouring under small-pox. A female servant (with had marks of vaccination) employed in the hospital was attacked with the disease, which assumed a confluent form. She was removed to the Mater Misericordiae Hospital, and ultimately recovered. The number of small-pox cases treated in the Mater Misericordiae Hospital up to the 24th of March amounted to 16, of these 7 were confluent, the others modified; two of the Sisters of Mercy, four students, a ward maid, and the cook contracted the disease; all recovered.

The Registrars generally reported most favourably of the working of the Compulsory Vaccination Act, and the beneficial results were manifest. The poorer classes who formerly entertained the strongest prejudices against vaccination, became most anxious to have the operation performed on their children. Nay, more the number of adults vaccinated and revaccinated within the three months was very considerable.

Scarlet fever was not so prevalent as usual; in some places, however, it proved very fatal. Thus in the Annamoe District, Rathdrum Union, 9 of the 22 deaths registered during the quarter resulted from this disease. In the Summerhill District, Trim Union, 7 of the 31 deaths registered were ascribed to scarlet fever. Six deaths from scarlet fever occurred in the Rosky District, Strokestown Union. The Registrar made the following report,—“Scarlet fever was the most prevalent disease during the quarter, in fact it has spread through the whole district; young

and old have suffered much from its ravages and were it not for the exertions of the medical officer I am sure the death-rate would have been much heavier."

Some of the Registrars referred to the presence of fever, croup, measles, and whooping cough in their districts. The Registrar of Ballinakill District, Abbey-lis Union, reported the death of a man, aged 70 years, from typhus.

The number of old people (as before stated) whose deaths were registered during the quarter was very large, and if the information as to the great ages attained can be relied upon, the Irish people must be singularly long-lived.

Over 20 are said to have attained the age of 100 years, of these 11 had exceeded the 100th year, 1 was registered as 112 years, 1 as 110 years, 1 as 109, 2 as 108, 3 as 107, &c., &c.

While some of the Registrars reported favourably as to the improvements in the sanitary condition of their districts, many more referred to the prevalence of disease as induced by the total want of all sanitary administration and the filthy habits of the people.

Quarterly
Reports.First
Quarter.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE PROVINCES.

Marriages.—Grouping the Unions or Superintendent Registrars' Districts by Provinces, it will be observed from the following table that there were 2,581 marriages registered in the province of Connaught during the first quarter of 1871, affording an annual ratio of 1 marriage in every 81 of the population; and in Munster 4,289, affording a ratio of 1 in 82; whereas in Ulster the ratio was only 1 in 161; and in Leinster, 1 in 158. As has been remarked in former reports, the first quarter of the year is much the most favoured by the Roman Catholic population for marriage; this fact accounts for the great difference between the marriage-rates in Connaught and Munster, and those in Ulster and Leinster.

The following Table shows, by PROVINCES, the number of Marriages registered during the First quarter of the years 1869, 1870, and 1871, together with the annual ratio to the estimated Population.

REGISTRATION PROVINCES.	MARRIAGES.					
	Quarter ending 31st March,					
	1869.		1870.		1871.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.

CONNAUGHT,	2,115	" 101	2,783	" 81	2,581	" 81
TOTAL,	10,181	1 in 134	11,966	1 in 113	11,315	1 in 114

Births.—Of the 41,615 births registered in Ireland during the first quarter of 1871, 8,966 occurred in Leinster, affording a ratio of only 1 in 37 of the estimated population. In Munster the number registered was 11,739; in Ulster, 13,714; and in Connaught, 7,196, affording respectively an annual ratio of 1 in 30, 34, and 29 of the estimated population.

Quarterly
Reports.
—
First
Quarter.

The following Table shows, by PROVINCES, the number of Births and Deaths registered during the First quarter of the years 1869, 1870, and 1871, together with the ratio to the estimated Population.

REGISTRATION PROVINCES.	BIRTHS.						DEATHS.					
	Quarter ending 31st March,						Quarter ending 31st March,					
	1869.		1870.		1871.		1869.		1870.		1871.

CONNAUGHT.	6,119	34	6,349	33	7,195	29	3,320	66	3,693	58	3,377	63
TOTAL.	38,280	35	40,770	34	41,615	33	26,987	52	28,324	48	25,430	51

Deaths.—Whilst the births registered in the province of Leinster, during the quarter ending 31st March, 1871, afforded the lowest ratio, the deaths registered gave the highest rate of mortality, the number being 7,346, equal to an annual ratio of 1 in 51; in Munster the number registered was 6,884, yielding a ratio of 1 in 51; in Ulster, 8,913, or 1 in 52; and in Connaught, 3,377, or 1 in 62 of the estimated population.

Second Quarter.—April, May, June.

Second
Quarter.

Marriages.—The number of marriages registered in Ireland during the second quarter of 1871 amounted to 5,674, equal to an annual ratio of 1 in every 238, or 421 per cent. of the estimated population. The average number registered in the corresponding period of the preceding five years was 5,436.

Births.—The births registered during the second quarter of 1871 amounted to 40,768—20,821 boys and 19,947 girls—affording an annual ratio of 1 in every 33.1, or 3.02 per cent. of the estimated population. The average number of births registered during the corresponding quarter of the preceding five years was 39,941.

Deaths.—There were 22,260 deaths—11,300 males and 11,060 females—registered during the quarter, affording an annual ratio of 1 in 60.6, or 1.65 per cent. of the estimated population. The average number registered during the second quarter of the previous five years was 23,700.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 30th June, 1871, amounted to 33,709—18,767 males and 13,942 females. The average number of emigrants during the corresponding quarter of the preceding five years was 33,187.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4-lb. loaf for the quarter ended 30th June 1871, was 7½d., which was 1d. higher than the average price for the corresponding period of 1870.

At the Dublin Corn Exchange the average price of oatmeal for the quarter was 15s. per cwt.; during the second quarter of the preceding year it was 15s. 2d.; in the corresponding period of 1864 it was only 10s. 6d.

At the Dublin Potato market the average prices of potatoes during the quarter ranged from 2s. 7d. to 5s. 2d. per cwt., against 3s. 10d. to 5s. 1d. in the corresponding quarter of 1870; the average prices for the second quarter of 1864 were only 2s. 11d. to 3s. 8d.

The average prices of beef at the Dublin Cattle market during the quarter were 50s. to 77s. 6d. per cwt., against 54s. 6d. to 68s. 6d. in the corresponding period of 1870; for the second quarter of 1864 the average prices were 53s. to 68s. 6d.

The following statement shows the average prices of the foregoing articles of food, in Dublin, during the second quarter of the years 1864-71:—

The average number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of 1871, was 45,991 against 50,168 for the corresponding period of 1870.

The average weekly number of persons receiving out-door relief during the quarter was 34,466, against 21,614 during the second quarter of 1870.

Of the persons receiving in-door relief during the second quarter of 1871 an average number of 534 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1870 the average weekly number was 503.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phoenix Park, during the second quarter of 1871 was 29.846 inches, against an average of 29.846 inches for the corresponding quarter of the preceding five years; the highest reading (30.409 in.) was on the 7th May, at 9.30 p.m., wind E.; and the lowest (29.060 in.) on the 19th April, at 3.50 p.m., wind S.S.W.

The mean temperature of the air during the quarter was 52.5°, against an average of 52.4° for the corresponding period of the preceding five years; the maximum temperature (76.4°) was on the 30th May, and the minimum (27.5°) on the 7th April.

Rain fell on 42 days during the quarter. The rain-fall measured 6.095 inches; the average amount for the second quarter of the previous five years was 5.258 inches. The greatest monthly rain-fall during the quarter was in April, when 3.374 inches were registered.

It blew on 23 days from W., on 18 days from E., on 12 days from N., on 10 days from S.E., on 8 days from N.W., on 7 days from S., on 5 days from S.W., on 3 days from N.E., and the air was calm on 6 days at 9.30 a.m.

HEALTH OF THE PEOPLE.

The state of the public health during the quarter was, on the whole, satisfactory. The number of deaths registered was 1,440 below the average of the corresponding period of the previous five years, and 1,050 less than in the second quarter of 1870.

Quarterly
Reports.
—
Second
Quarter.

The majority of the Registrars reported favourably as to the healthfulness of their districts, and the comparative immunity from epidemic disease.

As small-pox was epidemic in Great Britain, and no quarantine regulations had been adopted to prevent the importation of the disease, fatal cases occurred in various parts of the country.

Twenty-nine of the Registrars reported the presence of small-pox in their several districts. In Longford two fatal cases of small-pox occurred, they were "attacked immediately after their arrival from Dublin. The disease extended no farther." In Dundalk "about 13 families have been attacked, and there have been 5 fatal cases registered, 1 in the workhouse, and 4 in the town—1 young man aged 20; said to have been vaccinated; 1 young girl aged 17, ditto; 1 little girl aged 10, ditto; 1 child at workhouse, aged 7 months, not known; and 1 child, 3 months, unvaccinated."

At Queenstown "there were three deaths from small-pox during the quarter; the disease was imported in ships outward bound from Liverpool. As far as could be ascertained, none of the persons had been vaccinated." In Carlow "one case of small-pox is reported in which the patient passed through the illness favourably and recovered. *The disease in this instance was imported from Liverpool through the medium of some clothes worn by a victim to the malady.*" The Poor Law Medical Officers showed a praiseworthy zeal in carrying out the provisions of the Compulsory Vaccination Act.

As before stated, there was a general absence of epidemic disease. In some districts scarlet fever prevailed, especially in those where sanitary laws were ignored.

Very many of the deaths registered during the quarter occurred in persons of extreme old age—the cause of death in one instance in the Oughterard Union was "fracture of femur," age 104 years. In Anasaul district, Dingle—"one death registered of a person at the advanced age of 110 years." In Bandon "an unusual number of persons died at very advanced ages. Mentioning some of the oldest—1 female was 100 years, supposed to be more; another 96, a third 88, and a fourth 80 years of age; the ages of 5 males ranged from 80 to 84 years, whilst of both sexes seven others are registered as between 70 and 80, and several more as approaching 70 years of age." In Mitchelstown "one death has been registered of a person whose age was 100 years, and 1 of a person whose age was 95 years." The Registrar adds—"I believe both to have been a few years more." Of the 52 deaths registered in Castleblayney, "30 were cases where the persons reached ages ranging from 60 to 100 years, and averaging 79 years." In Coolmountain district, Dunmanway Union, "5 of the deaths registered (17) were of persons over 80 years of age, one woman attained the great age of 103 years."

There was in some parts of the country a considerable improvement as regards sanitary arrangements. The numberless complaints of deficient sewerage, imperfect supply of water, &c., merely show that the provisions of the Sanitary Act of 1866 were not carried out. The success of the Compulsory Vaccination Act proves that a law when properly administered will prove effective.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE PROVINCES.

Marriages.—The number of marriages registered in the province of Leinster, during the quarter ended 30th June, 1871, affords an annual ratio of 1 in 195; in Ulster, the ratio was 1 in 207; in Munster, 1 in 301; and in Connaught, 1 in 353.

The following Table shows, by PROVINCES, the number of Marriages registered during the SECOND quarter of the years 1869, 1870, and 1871; together with the annual ratio to the estimated Population:—

Quarterly
Reports.
Second
Quarter.

TOTAL,	38,822	55	40,567	53	40,785	53	21,130	85	22,310	88	23,260	61

Deaths.—The number of deaths registered in the province of Leinster during the second quarter of 1871 afforded an annual ratio of 1 in 52; in Munster, the ratio was 1 in 60; in Ulster 1 in 63; and in Connaught, 1 in 74 of the estimated population.

Third Quarter.—July, August, September.

Third
Quarter

Marriages.—The number of marriages registered in Ireland during the third quarter of 1871 amounted to 5,313, equal to an annual ratio of 1 in every 254, or 394 per cent. of the estimated population. The average number registered in the corresponding period of the preceding five years was 5,374.

Quarterly
Reports.
—
Third
Quarter.

Births.—There were 34,023 births registered in Ireland during the quarter ended 30th September, 1871—17,426 boys and 16,596 girls—representing an annual ratio of 1 in every 39·6, or 2·52 per cent. of the estimated population; the average number of births registered during the corresponding quarter of the preceding five years was 34,142.

Deaths.—The deaths registered in Ireland during the third quarter of the year 1871 amounted to 17,451—8,851 males and 8,600 females—affording an annual ratio of 1 in every 77·3, or 1·29 per cent. of the estimated population. The average number registered during the corresponding quarter of the previous five years was 18,416.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 30th September, 1871, amounted to 17,079—9,586 males and 7,493 females—the average number who emigrated during the corresponding quarter of the previous five years was 17,109.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders & Co.'s 4-lb. loaf for the quarter ended 30th September 1871, was 7d., being one halfpenny cheaper than it was during the corresponding period of 1870, and one penny dearer than in the third quarter of 1864.

At the Dublin Corn Exchange the average price of oatmeal for the quarter was 15s. 1d. per cwt.; in the third quarter of 1870 it was 17s. 1d.; while in the corresponding quarter of 1864 it was only 10s. 8d.

At the Dublin Potato market the average prices of potatoes during the quarter ranged from 2s. 10d. to 4s. 8d. per cwt., against 3s. 8d. to 5s. 1d. in the corresponding period of the preceding year; the average prices for the third quarter of 1864 were only 2s. 7d. to 3s. 10d.

The average prices of beef at the Dublin Cattle market during the quarter were 59s. to 74s. per cwt., against 54s. 6d. to 68s. 6d. in the corresponding period of 1870; for the third quarter of 1864 the prices were 51s. to 62s. 6d.

The following statement shows the average prices of the foregoing articles of food in Dublin, during the third quarter of the years 1864-71:—

YEARS.	BREAD (Messrs. Manders & Co.'s 4-lb. loaf).	OATMEAL (Corn Exchange), per cwt.	POTATOES (at Fetters Market), per cwt.	BEEF (at Dublin Cattle Market), per cwt.
1864 (3rd quarter),	d.	s. d.	s. d.	s. d.
1865	0	10 8	2 7 to 3 10	51 0 to 62 6
1866	0	15 3	2 8 to 4 0	50 0 to 67 6
1867	6½	16 6	3 3 to 5 2	62 0 to 69 6
1868	8	19 4	3 5 to 5 1	50 0 to 66 6
1869	8	10 5	4 2 to 6 5	51 0 to 66 6
1870	7	15 10	4 10 to 6 8	49 6 to 68 0
1871	7½	17 1	3 8 to 5 1	54 6 to 68 6
	7	15 1	2 10 to 4 8	50 0 to 74 0

The average number of persons in Ireland receiving in-door relief on Saturdays during the third quarter of the year 1871 was 41,332, against 43,751 for the corresponding period of 1870.

The average weekly number of persons receiving out-door relief during the quarter was 23,744, against 20,292 for the third quarter of 1870.

Of the persons receiving in-door relief during the third quarter of the year 1871, an average number of 531 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in External Hospitals; in the corresponding quarter of 1870 the average weekly number was 491.

THE WEATHER.

Quarterly
Reports.
Third
Quarter.

The mean height of the barometer at the Ordnance Survey Office, Phoenix Park, during the third quarter of the year 1871, was 29.904 inches, against an average of 29.903 inches for the corresponding quarter of the preceding five years; the highest reading (30.505 inches) was on the 27th August, at 9.30 p.m., the air being calm; and the lowest (29.103 inches) on the 27th September, at 3.30 p.m., wind E.N.E.

The mean temperature of the air during the quarter was 57.8°, against an average of 58.7° for the corresponding period of the preceding five years; the maximum temperature (81.4°) was on the 13th August, and the minimum (30.0°) on the 22nd September.

Rain or snow fell on 52 days during the quarter. The rain-fall measured 9.982 inches; the average amount for the third quarter of the previous five years was 6.410 inches. The greatest monthly rain-fall during the quarter was in July, when 4.832 inches were registered.

The wind blew on 23 days from W., on 17 from S., on 16 from S.W., on 9 from S.E., on 7 from E., on 5 days each from N., N.E., and N.W., and the air was calm on 5 days, at 9.30 a.m.

HEALTH OF THE PEOPLE.

According to the number of deaths registered during the quarter, the public health was in a satisfactory state. The registered deaths showed a decrease of 995 as compared with the average number in the corresponding quarter of the previous five years, and were 758 less than in the third quarter of the year 1870.

Scarlet fever and small-pox were very prevalent during the quarter. Scarlet fever was generally epidemic; 75 Registrars noted the presence of this pestilence in their several districts. The Registrar of the Bridgetown District, Limerick Union, remarked that "scarlatina has been very prevalent during this quarter, and many cases of a very bad form; but though up to this only 7 deaths have been registered (the total deaths were 21), yet I know of, at least, as many more which will be registered in a few days. In some parts of the district it was epidemic; even a great many old people, and people from 20 to 40 years old, have had it." Of the 10 deaths registered in the Killeen District, Dunshaughlin Union, 4 were caused by scarlet fever.

Small-pox was spreading in various parts of the country. Twenty-three of the Registrars reported upon the appearance of the disease in their several districts. Two cases of confluent small-pox were imported into the Forkill District, Newry Union, from Middlesboro'; they both, however, recovered.

Of the 50 cases of small-pox which occurred in Dundalk District, the Registrar recorded 10 deaths.

In the Ravensdale District, Dundalk Union, some cases of small-pox occurred. There was 1 death: "infection imported from England." Two fatal cases of the disease took place in Portrush; of these, 1 was a child (unvaccinated), aged 14 months, recently arrived from Scotland. In the Headford District, Tuam Union, the Registrar reported 20 cases of small-pox, and only 1 death therefrom. Nineteen cases of small-pox were reported from Waterford. The Registrar stated that "all recovered except one, which was directly imported from Liverpool, and complicated with purpura hemorrhagica. . . . I attribute the providential escape of this city from the threatened epidemic to the perfect vaccination of all the children in this district, and also to the great amount of revaccination performed on the appearance of the first case of small-pox, and previous to it." An unvaccinated child, aged 3 months, died in the Crumlin District, Antrim Union; three other children in the same family who had been successfully vaccinated during infancy escaped the disease.

Quarterly
Reports.
—
Third
Quarter.

Fever, especially typhoid, prevailed in some districts. In Tallow District, Carlow Union, "several cases of relapsing fever occurred; 1 only fatal in an aged and broken-down subject." A death from relapsing fever occurred in the Castleblayney District.

Six of the persons whose deaths were registered during the quarter were stated to have been centenarians. The Registrar of Cookstown District observes that "the great ages attained in some cases are very extraordinary. There were registered in the quarter, out of a total of 35, 4 deaths between the ages of 60 and 70 years, 7 between 70 and 80, 2 between 80 and 90, while 2 attained the extreme term of 102 (female) and 108 (male) respectively. I have made careful inquiry respecting these two cases, and have no reason to think the ages are exaggerated; they are both remembered as 'old people' by individuals long past their climacteric." In the Derroock District, Ballymoney Union, "one death occurred at the advanced age of 105 years (authenticated)."

Improvements in the sanitary condition of certain localities were reported, while some districts appear to have been in a sadly neglected condition. The Registrar of Castlegregory, Dingle Union, states that "scarlatina prevailed at Magharates and in no other part of the district. Some children died from it. The severity which characterized it there may probably be ascribed to the excessive filth of the villages and to the almost total want of good water in every part of that sandy peninsula." Seven other Registrars made reports equally unfavourable as to the sanitary condition of their districts.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE PROVINCES.

Marriages.—The number of marriages registered in the province of Leinster during the quarter ended 30th September, 1871, affords an annual ratio of 1 in 184; in Ulster, 1 in 227; in Munster, 1 in 320; and in Connaught, 1 in 514.

The following Table shows, by PROVINCES, the number of Marriages registered during the Third quarter of the years 1869, 1870, and 1871, together with the annual ratio to the estimated Population.

REGISTRATION PROVINCES.	MARRIAGES.

Deaths.—The deaths registered in the Province of Leinster during the quarter ended the 30th September, 1871, represent an annual ratio of 1 in 66; in Munster the ratio was 1 in 78; in Ulster, 1 in 79; and in Connaught, 1 in 99.

Fourth Quarter.—October, November, December.

Marriages.—There were 6,158 marriages registered in Ireland during the fourth quarter of 1871, a number affording an annual ratio of 1 in every 219, or .457 per cent. of the estimated population. The average number of marriages registered in the corresponding quarter of the previous five years was 6,183.

Fourth
Quarter.

Births.—There were 34,950 births registered in Ireland during the quarter ended 31st December, 1871—17,913 boys and 17,037 girls—representing an annual ratio of 1 in every 39.6, or 2.59 per cent. of the estimated population; the average number of births registered during the corresponding quarter of the preceding five years was 33,468.

Deaths.—The deaths registered in Ireland during the fourth quarter of the year 1871 amounted to 22,217—11,113 males and 11,104 females—a number affording an annual ratio of 1 in every 60.7, or 1.65 per cent. of the estimated population. The average number registered during the corresponding quarter of the previous five years was 20,894.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 31st December, 1871, amounted to 10,097—5,586 males and 4,511 females. The average number of emigrants during the fourth quarter of the preceding five years was 11,058.

PRICES OF PROVISIONS, AND PAUPERISM.

During the whole of the fourth quarter of 1871 the price of Messrs. Manders and Co.'s 4-lb. loaf was 8d., being one penny higher than the average price in the corresponding quarter of 1870, and 2½d. higher than in the fourth quarter of 1864.

The average price of oatmeal in Dublin for the quarter was 15s. per cwt., being one penny under the average for the corresponding quarter of 1870. In the fourth quarter of 1864 the average price was 10s. 10d. per cwt.

Quarterly
Reports.
—
Fourth
Quarter.

The average prices per cwt. of potatoes at the Dublin Potato market for the fourth quarter of 1871 were 2s. 6d. to 4s. 4d. In the fourth quarter of 1870 the average prices were 2s. 10d. to 3s. 8d., and in the corresponding quarter of 1864 they were 2s. 2d. to 3s. 4d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 58s. to 70s. 6d. per cwt., against 54s. to 70s. 6d. in the corresponding quarter of 1870, and 49s. 6d. to 65s. 6d. in the fourth quarter of 1864.

The following statement shows the average prices of the above-mentioned articles of food in Dublin during the fourth quarter of the years 1864-71:—

YEARS.	BREAD (Measure, Bakers & Co.'s 4-lb. loaf).	CORN (Corn Exchange), per cwt.	POTATOES (at Dublin Market), per cwt.		BEEF (at Dublin Cattle Market), per cwt.	
			s. d.	s. d.	s. d.	s. d.
1864 (4th quarter),	5½	10 10	2 2	2 4	49 6	to 53 8
1865 "	7	15 1	2 0	2 8	56 8	to 64 6
1866 "	7½	15 11	6 1	4 11	45 8	to 47 0
1867 "	9	17 4	3 10	4 7	45 6	to 53 0
1868 "	7½	15 4	2 11	4 7	49 6	to 55 0
1869 "	6½	15 1	2 11	4 0	52 5	to 57 0
1870 "	7	15 1	2 10	4 5	54 0	to 70 8
1871 "	6	15 0	2 6	4 4	58 0	to 70 6

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1871 was 44,957, against 46,674 for the corresponding period of 1870.

The average weekly number of persons receiving out-door relief during the quarter was 23,878, against 20,640 for the fourth quarter of 1870.

Of the persons receiving in-door relief during the fourth quarter of 1871, an average number of 534 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1870 the average weekly number was 505.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phoenix Park, during the fourth quarter of the year 1871 was 29.977 inches, against an average of 29.852 inches for the corresponding quarter of the preceding five years; the highest reading (30.496 inches) was on the 11th December, at 3.30 p.m., wind W.S.W.; and the lowest (29.052 inches) was on the 1st October, at 3.30 p.m., wind W.

The mean temperature of the air during the quarter was 44.6°. The maximum temperature (66.7°) was on the 13th October, and the minimum (23.5°) on the 4th December.

Rain or snow fell on 46 days during the quarter. The rain-fall measured 5.237 inches, of which 2.910 inches were registered in the month of October.

The west wind was by far the most prevalent during the quarter, it having blown on 39 days. The wind blew on 17 days from S.W., on 11 days from S., on 9 days from E., on 6 days from S.E., on 5 days from N., on 1 day each from N.E., and N.W., and the air was calm on 3 days during the quarter at 9.30 a.m.

HEALTH OF THE PEOPLE.

The mean temperature during the three months ending the 31st of December, 1871, was 2.6° higher than in the corresponding quarter of the year 1870, and the mortality showed an increase of 1,508.

The deaths from small-pox during the quarter amounted to 441. All the deaths from that disease registered in the year 1870 numbered only 32.

Scarlet fever was very prevalent; no less than 89 Registrars reported its presence in their several districts. The Registrar of the Killaugh district, Youghal, observes that the "scarlatina was of a very severe type. In one case, from the suddenness of the death it was thought necessary to hold a coroner's inquest. In every instance that came under my observation, the scarlatina could be traced to direct contagion, showing the necessity of isolating those cases as well as those of small-pox." Of the 43 deaths registered in the Castlegregory district, Dingle Union, 19 were caused by scarlet fever. The picture by the Registrar of the sanitary condition of the district fully accounts for the excessive mortality. His description is as follows—"This division (Castlegregory) comprises the Magharees peninsula, throughout the whole of which the water used for drinking is procured from holes dug for the occasion in the sand. It is consequently always impure, and often disgusting. Despite the efforts of the Relieving Officer, who has been zealous to mitigate nuisance, the sanitary state of the village of Castlegregory stands in need of great improvement. Only one well supplies the whole village with water, and it is situate at the bottom of a long street, placed on a considerable declivity, down which flow, after every fall of rain, streams laden with filth, a portion of which inevitably enters it despite of all care, and of some improvements which have been made in connexion with the well. In all parts of the district, and of the Union, wherever the supply of water is comparatively pure, scarlatina has either not existed or has been very mild, while, on the contrary, it has been exceedingly fatal when the water is obviously polluted. In Castlegregory especially, but also at Magharees, the severe and fatal cases occurred almost without an exception, in the houses that an experienced observer would *a priori* have pointed out as peculiarly liable to such fatality."

In the Dunkavin district, Balinglass Union, and the Newmarket district, Kanturk Union, 4 and 3 deaths respectively were caused by diphtheria. The Registrars state, that heretofore the disease was almost unknown in their districts.

Whooping-cough prevailed to a considerable extent, and in several instances proved fatal.

There was a comparative freedom from the various types of continued fever and measles.

The deaths of 11 centesarians were reported. One person died at Clonmeyle, Macroom Union, who was stated to have attained the extraordinary age of 108 years.

In Donagall, Banbridge, and Ennistimon, there died 3 persons whose respective ages were (as reported) 105 years.

Many districts still remained in the most wretched condition as to sanitary arrangements; indeed the provisions of the Sanitary Act of 1866 were rarely, if ever, brought into force.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE PROVINCES.

Marriages.—The number of marriages registered in the Province of Ulster during the fourth quarter of 1871 amounted to 2,628, a number representing an annual ratio of 1 in every 175 of the estimated population; in Leinster the number was 1,768, or 1 in 186; in Munster 1,160, or 1 in 302; and in Connaught 602, or only 1 in 348.

[TABLE.]

Quarterly
Reports.
Fourth
Quarter.

The following Table shows, by PROVINCES, the number of Marriages registered during the Fourth quarter of the years 1869, 1870, and 1871; together with the annual ratio to the estimated Population represented by the number of Marriages registered:—

REGISTRATION PROVINCES.	MARRIAGES.					
	Quarter ended 31st December,					
	1869.		1870.		1871.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER,	1,818	1 in 185	1,815	1 in 183	1,768	1 in 185
MUNSTER,	1,503	" 275	1,171	" 301	1,326	" 303
ULSTER,	2,327	" 122	2,503	" 124	2,524	" 176
CONNAUGHT,	531	" 377	550	" 382	602	" 348
TOTAL,	5,139	1 in 230	5,041	1 in 224	6,120	1 in 215

Births.—The births registered in Leinster during the fourth quarter of 1871 afford an annual ratio of only 1 in 42 of the estimated population; in Munster there were registered 9,391 births—a number equal to an annual ratio of 1 in 37; in Ulster the number was 11,778, or 1 in 39; and in Connaught 5,932, or 1 in 36.

The following Table shows, by PROVINCES, the number of Births and Deaths registered during the quarters ending 31st December, 1869, 1870, and 1871, and the ratio to the estimated Population:—

REGISTRATION PROVINCES.	BIRTHS.						DEATHS.					
	Quarter ending 31st December,						Quarter ending 31st December,					
	1869.		1870.		1871.		1869.		1870.		1871.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.

TOTAL,	33,034	41	34,184	39	34,560	39	20,071	66	20,709	65	21,217	61

Deaths.—There were 6,436 deaths registered in the province of Leinster during the fourth quarter of 1871, the annual ratio afforded being 1 in 51; in Munster there were registered 6,023 deaths, or 1 in 58 of the estimated population; in Ulster, 7,175, or 1 in 64; and in Connaught, 2,583, or 1 in 81.

TOPOGRAPHICAL DESCRIPTION of the EIGHT DIVISIONS into which IRELAND has been divided for Statistical purposes.

No. I. The North-Eastern Division.—This division may be described by a line passing southward from Lough Foyle through the counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the county of Monaghan, and thence eastward to Carlingford Lough; the north and east being on the seaboard.

No. II. The North-Western Division is bounded on the east by the division just described, from Lough Foyle to a point a little south of Six Mile Cross, in the county of Tyrone, and may be described by a line drawn thence S.W. through the county of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the county of Cavan belonging to the Enniskillen Union, into the county of Leitrim, crossing Lough Allen, thence into the county of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysadare Bay; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

No. III. The Eastern Division is situated in the provinces of Leinster and Ulster; it extends along the Irish Sea and St. George's Channel, from Warrenspoint, in the county of Down, to the south of Cahore Point, in the county of Wexford, stretching inland about twenty-five miles, and embracing the counties of Louth, Dublin, and Wicklow, and portions of the counties of Carlow, Cavan, Kildare, Meath, and Wexford; together with small portions of the counties of Armagh and Monaghan.

No. IV. The North Midland Division is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the county of Tyrone, to Tyrrelspass, in the county of Westmeath. Virginia, in the county of Cavan, is situated on its eastern border, and Tulak, in the county of Roscommon, on its western.

No. V. The South Midland Division situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Berria, in the county of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the county of Tipperary, and from that point south to Fethard, in the same county, thence westward to the northern base of the Galty Mountains, and in a north-westerly direction, to Pallasgreen, in the county of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South-Western" divisions.

No. VI. The Western Division.—This division extends southwards from Sligo and Killala Bays to the northern back of the River Shannon, lying westward of Limerick; the extreme points, north and south, being Benwee Head, in the county of Mayo, and Loop Head, in the county of Clare, a distance in or about 120 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and inlets. This division has been extended much more inland than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland; the Unions situated on the extreme east are Boyle, Castlereagh, Glennamaddy, Mounthellaw, Ballinasloe, and Portlanna.

No. VII. The South-Eastern Division.—This division extends from its junction with the "Eastern" division southward of Cahore Point, in the county of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the South Midland division. It embraces the county of Waterford; nearly the whole of the county of Wexford; parts of the counties of Carlow, Kilkenny, and Tipperary; that portion of the county of Limerick (33,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork County.

No. VIII. The South-Western Division extends along the southern and western coasts from Cork Harbour to the river Shannon, and embraces the county of Kerry, nearly the whole of the counties of Cork and Limerick, and a small portion of the county of Clare, comprised in the Limerick Union.

POPULATION OF IRELAND (including Army, Navy, and Merchant Seamen on shore and in port)
estimated to the middle of each of the Years 1801 to 1871, inclusive:—

Middle of the Years	Estimated Population.			Middle of the Years	Estimated Population.			Middle of the Years	Estimated Population.		
	Persons.	Males.	Females.		Persons.	Males.	Females.		Persons.	Males.	Females.

1823	3,984,808	3,427,971	3,560,308	1857	8,395,374	8,945,838	8,961,836	1851	5,395,097	5,616,651	5,763,364
1824	4,073,160	3,471,836	3,604,399	1858	7,909,360	8,740,417	8,860,970				

NOTE.—This table has been constructed for the years 1801 to 1851.—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1831.

1831 to 1841.—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1841 to 1846.—By taking the English average birth-rate of 1 in 51, and death-rate of 1 in 40, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1846 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1851 to 1871.—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1851 and 1871 as explained for the last period.

ANNUAL ABSTRACTS
OF
MARRIAGES, BIRTHS, AND DEATHS.
1871.

* For remainder of Belfast see next page.

Note.—The Registrars' Districts are sub-divisions of the Union or Superintendent Registrars' Districts, and are identical with the Sanitary Districts of the same names, except in a few instances.

The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrars' District.

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, less than the deaths, to the extent stated.

IRELAND.—SUPPLEMENTARY TABLE OF 1871.

[In the foregoing Tables all the Diseases, either having a distinct character, or fatal to any considerable number of persons, are classified under 116 heads; some of which, however, include groups of very distinct diseases,—such as are fatal to only a few persons, or diseases which are often confounded with other diseases. The rule has been to refer the distinct diseases to heads under which the cases were so numerous that the additional numbers would not interfere with the calculated proportions. Where it is desired, partial correction

No. in the Table of Diseases under which the Cases are entered.	CAUSES OF DEATH.	ALL AGES.	AGES OF MALES.																		Total under 5 years.	Under 1 year.

* The Registration Counties consist of groups of Superintendent Registrar's Districts or Poor Law Unions. Whenever a District or Union exceeds half more than one County, it is assigned wholly to that County in which the greater portion of the population is located, and all the Registration Counties differ more or less from the Counties Proper.

According to the Census of 1871.

LETTER to the REGISTRAR-GENERAL on the CAUSES of DEATH in IRELAND,
from WILLIAM M. BURKE, ESQ., F.R.C.S.

YEAR 1871.

SIR,

I beg to bring under your notice a few remarks in reference to the principal causes which contributed to the mortality of the year 1871.

Again I find it necessary to state that the registration of deaths in Ireland remains imperfect; the causes of the imperfection referred to in the year 1870 still obtain—the principal one being the facility afforded for interments, the Registrar's certificate of death not being required in the first instance.

The causes of death are often vaguely and loosely stated, so as to render them in a great degree valueless for scientific purposes. The English certificate refers to the primary and secondary causes of death, and so affords most valuable information. Thus a child dies in Ireland, and the medical certificate states that the cause of death was dropsy—that is, the secondary cause is the only one referred to, whereas if the primary cause had to be sought, it very probably would be discovered that the dropsy was the result of the scarlatinal poison. Again, the death tables, in consequence of the primary and secondary causes not being stated, give very fallacious figures as to the number of deaths resulting from insanity; the certificate received from lunatic asylums rarely name insanity as the cause of death—the cause assigned generally being one of the following: paralysis, epilepsy, apoplexy, diarrhoea, &c.

The medical men at large are anxious that the form of certificate of the cause of death should be so altered as to relieve them from the responsibility of being informants of the death. They would gladly afford every information which could tend to the advancement of science.

Of the total deaths registered during the year, the causes of death were certified to by medical men in 43,113 instances, 2,326 by coroners, making a total of the certified deaths of 45,439. In 3,317 instances the cause of death was not certified by the medical attendant, and 38,727 persons died unattended by a medical man. No particulars as to medical certificate were given in 865 cases.

The total deaths registered during the year amounted to 88,348, showing a decrease of 2,114 as compared with the year 1870.

I. ZYMOTIC DISEASES.

The total number of deaths from zymotic diseases registered during the year amounted to 13,936—7,010 males and 6,926 females. In the preceding year 14,548 persons died from zymotic diseases. Of all the deaths registered during the

year, 1 in every 6·3 resulted from this class of diseases. Preventable diseases proved fatal to 26 in 10,000 of the population.

Fever proved fatal in 3,176 instances—1,667 males and 1,509 females—classified as follows: typhus 873, typhoid or enteric 930, and simple continued fever 1,373. In every 10,000 of the population 6 persons succumbed to fever.

Scarlet fever numbered 2,207 victims—1,150 males and 1,057 females—or 4 in every 10,000 of the population.

For some years previous to 1871 Ireland had enjoyed a singular immunity from small-pox. In 1864 the Compulsory Vaccination Act came into operation, the disease was then epidemic in certain localities, and the deaths registered from it amounted to 854; in 1865 the number fell to 461; in 1866 to 194; in 1867 to 21; in 1868 the number was 23; in 1869, 20; in 1870, 32; during the year 1871 the disease became epidemic, and carried off 665 persons—366 males and 299 females. Of the deaths from small-pox registered, 277 occurred in the Belfast Union, 133 in the North Dublin Union, and 99 in the South; only 9 deaths from small-pox were registered in the province of Munster, and 13 in Connaught.

1,736 deaths were caused by diarrhoea—863 males and 874 females.

Whooping-cough killed 1,388 persons—632 males and 756 females; of these, 1,291 were children under 5 years of age.

547 deaths resulted from measles—255 males and 292 females. In the year preceding, 954 deaths resulted from this disease. 302 of the deaths from measles occurred in Ulster, 149 in Connaught, 74 in Leinster, and 22 in Munster.

The deaths from croup numbered 1,365—750 males and 615 females; of these, 1,211 were under 5 years of age. The disease proved most fatal in the South-Western Division, in which there were 323 deaths; in the Western there were 261; in the North-Eastern, 246; in the Eastern, 181; in the South-Eastern, 125; in the South-Midland, 99; in the North-Midland, 70; and in the North-Western, 60.

Diphtheria was the cause of 226 deaths—123 males and 103 females.

309 deaths were ascribed to quinsy.

394 women died of metris or puerperal fever.

Two men died from glanders.

Erysipelas proved fatal in 319 instances.

Influenza caused 105 deaths.

284 deaths were ascribed to dysentery.

II. CONSTITUTIONAL DISEASES.

Under the head of constitutional diseases 16,948 deaths (8,152 males, 8,796 females), or 1 in every 5·2 of the total deaths, and 31 in every 10,000 of the population, were registered.

10,427 persons (5,036 males and 5,391 females) died from phthisis or pulmonary consumption; equal to 1 in 8·5 of the total deaths, and 19 in every 10,000 of the population.

Mesenteric disease caused 1,279 deaths—602 males and 677 females. 1,223 deaths (659 males and 563 females) resulted from hydrocephalus or water on the brain. 852 deaths (466 males and 386 females) were referred to scrofula.

1,732 persons (767 males and 965 females) died from cancer.

1,249 deaths (522 males and 727 females) were vaguely returned as from dropsy.

III. LOCAL DISEASES.

31,208 deaths (16,801 males and 14,407 females), or 1 in every 2·8 of the total deaths, and 58 in every 10,000 of the population were referred to local diseases.

From diseases of the nervous system there died 8,518—4,776 males and 3,742 females; of these deaths, 4,100 (2,290 males and 1,810 females) were caused by convulsions. Of the foregoing, there were only 26 over 10 years of age. Apoplexy numbered 881 deaths—502 males and 379 females; paralysis, 1,710—939 males and 771 females; inflammation of the brain and its membranes, 498; epilepsy, 291; insanity, 181; chorea, 5; and brain disease unspecified, 852.

Diseases of the circulatory organs caused 3,760 deaths—1,986 males and 1,774 females; 80 of these were referred to pericarditis or inflammation of the heart's covering; 107—92 males and 15 females—to aneurism; and the remainder to heart disease unspecified.

Diseases affecting the respiratory organs, excluding phthisis or pulmonary consumption, caused 12,645 deaths—6,403 males and 6,242 females. Of these, 9,416 (4,661 males and 4,855 females) were ascribed to bronchitis; 1,647 (1,023 males and 624 females) to pneumonia or inflammation of the lungs; 97 to laryngitis or inflammation of the wind-pipe; 324 to pleurisy; 523 to asthma; and 638 to lung disease unspecified.

4,591 deaths (2,524 males and 2,067 females) resulted from diseases affecting the organs of digestion; of these, enteritis or inflammation of the bowels caused 530 deaths; liver disease, 1,061; hepatitis or inflammation of the liver, 239; jaundice, 157; stomach disease unspecified, 980; gastritis or inflammation of the stomach, 278; peritonitis, 294; ascites, 285; hernia, 133; illeus, 396, &c.

The deaths from diseases of the urinary organs amounted to 1,168—883 males and 285 females; of these, 263 were ascribed to nephritis or Bright's disease; 108 to diabetes; 83 to ischuria; 80 to cystitis or inflammation of the bladder; 78 to nephritis or inflammation of the kidneys; 19 to stone, and 547 to kidney disease.

Diseases of the generative organs caused 133 deaths—5 males and 128 females.

208 deaths (122 males and 86 females) resulted from diseases affecting the organs of locomotion.

Affections of the tegumentary system resulted in 185 deaths.

IV. DEVELOPMENTAL DISEASES.

Diseases incidental to the growth and decay of the human frame caused 31,361 deaths—9,441 males and 11,910 females.

The number of deaths returned as resulting from old age was 15,997—6,956 males and 9,041 females. 238 persons (84 males and 154 females) were stated to have reached the advanced age of 100 years and upwards.

The premature births amounted to 220—117 males and 103 females.

Nine deaths (4 males and 5 females) were ascribed to cyanosis; of these, 2 females were certified as having reached the respective ages of 48 and 64 years.

Spina bifida was the cause of 12 deaths (8 boys and 4 girls), all under two years of age. 13 deaths were referred to other malformations.

261 deaths were caused by teething.

616 women (exclusive of 394 who died from metris) perished during or after childbirth.

For every 150 children born during the year 1 mother died.

V. VIOLENT DEATHS.

The number of deaths from violence amounted to 3,101—1,488 males and 613 females. Of these, 1,835 were accidental, viz.: 644 (495 males and 149 females) from fractures and contusions, 17 males and 1 female from gunshot wounds, 20 males and 8 females from cuts and stabs, &c., 451 from burns or scalds, 19 from poison, 393 from drowning—of those drowned 323 were males and 70 females, 76 from suffocation, and 206 from accidental causes unspecified.

84 deaths were homicidal; 112 (87 males and 25 females), suicidal.

Two men were executed during the year.

68 of the deaths from violence were not classified.

In 406 cases of sudden death (255 males and 151 females), the cause was unascertained.

The cause of 1 in every 37 of the total deaths was unspecified or ill-defined.

I am,

Sir,

Your obedient servant,

W. M. BURKE.

To

The Registrar-General.

COPY of CIRCULAR relating to REGISTRATION of MARRIAGES celebrated by
the ROMAN CATHOLIC CLERGY, 26 and 27 Vic., cap. 90.

General Register Office, Dublin,
31st December, 1863.

SIR,

I request you will furnish each Parish Priest within your District—who may apply to you for the same—with six *blank* Forms of Certificates of Marriage, which you will carefully take from the Certificate Book forwarded to you, and also with six of the printed Envelopes, addressed to “The Registrar of Births, Deaths, and Marriages.”

By this course—which has been strongly recommended to me by many Dignitaries of the Roman Catholic Church, and approved of by the Law Officers of the Crown*—the convenience of the Catholic Population, especially those of the poorer classes, will be greatly promoted in regard to the Registration of their Marriages.

A further supply of Certificates will be forwarded on your application—from which *blank* Forms will be furnished by you, from time to time, to those Parish Priests within your District who may require them. You will request each Rev. Gentleman obtaining the Certificates, to give you a receipt for them (on the accompanying Forms), in order that you may be able to account to me for all the Certificates intrusted to your care; and you will furnish me, at the end of each month, with the Names and Addresses of those Clergymen to whom you supply them. You will observe they are on *Water-marked* paper, with the words “Certificates of Marriage” printed thereon.

I beg to say that I feel assured you will discharge the duties of your office with zeal, discretion, and courtesy, and thus largely contribute to the success of the very Important Measures, in the carrying out of which you have so readily undertaken to assist by accepting the office of Registrar.

I am, Sir,

Your obedient Servant,

WILLIAM DONNELLY,

Registrar-General.

To the

Registrar of Births, Deaths, and Marriages,
District of —————

* The Right Honorable Thomas O'Hagan, Attorney-General (now Lord O'Hagan); and James A. Lawson, Esq., Solicitor-General—now a Judge of the Common Pleas.
